

Ayşe Özbil Torun

Dr. Ayşe Özbil Torun received her B.Sc. (2000) and M.Arch (2002) degrees in Architecture from Yıldız Technical University and Middle East Technical University respectively. She obtained her Ph.D. (2010) degree in Architecture from Georgia Institute of Technology with dissertation titled “Walking to the Station: The Effects of Street Connectivity on Walkability and Access to Transit”. During her Ph.D. studies she taught architectural design studio for 4 consecutive years at Georgia Institute of Technology College of Architecture. Before joining Northumbria University as a Senior Lecturer, Dr. Özbil Torun worked at Okan University Department of Architecture as an assistant professor and at Özyeğin University as an Associate Professor between 2010 and 2013 and between 2013 and 2017 respectively. She currently teaches at the Department of Architecture and Built Environment, including Architectural History & Theory, Design studio, and PhD and MSc supervision.

Dr. Özbil Torun’s research interests mainly lie in the fields of spatial modeling and urban form analysis using space syntax techniques. Her work is directed towards pedestrian-friendly neighborhood and street design strategies enhancing active transportation in cities. Her recent studies have focused on walkability and obesity, transit-oriented planning, and design of sustainable cities. Dr. Özbil Torun has been a member of the editorial board of Urban Design International since 2012, and her work has been published nationally and internationally.
